

STUDENTS ON CAMPUS FACULTY COMMITTEES

All Campus Faculty committees, except the Committee on Tenure, shall have at least one student representative as a member. The Campus Faculty shall determine the maximum number of student members for each committee and their method of election. In establishing the tenure and appointment (and reappointment) procedures for student members, care should be exercised to assure that student members be afforded a reasonable opportunity to become acquainted with their committee responsibilities and activities and to perform adequately their duties as representatives of the student body.
